***The Trekker Transit option includes four manufacturer installed red wheelchair transportation anchors. The Trekker Transit model has been crash tested and conforms to RESNA WC19 standards. Anthropomorphic Test Device weights are TR12T 75lbs/34kg and TR14T 110lbs/50kg.

The Convoid Trekker Mobility Base was tested with the Trekker Seating Module equipped with a head support and wheelchair anchored pelvic lap belt. Do not use the foot positioners on the Convoid Trekker during transit in a motor vehicle. The performance and safety of accessories and/or other seating options not tested by Convoid is unknown, and no warranty or claim about their performance is or can be made.

Furthermore, when being transported in a vehicle it is Convoid's position that the wheelchair user transfer from the wheelchair into appropriate vehicle seating during transportation. Please note that at this time, the Department of Transportation has not officially approved any tie-down system for a user while in a wheelchair, therefore Convoid cannot recommend a transit system.

For more information on RESNA WC-19 and WC-20 standards please visit <http://www.nercwt.pitt.edu/WC19.html>.
