

This form is printer friendly. Please print and use it to record the needed measurements. Then fill in the form electronically, answer a few additional questions, and submit. One of Tadpole Adaptive's staff members will contact you to discuss the recommended size of equipment.

Measurements Form

Standing Measurements (or laying on back)

A	Floor to Buttocks (Most frequently used when measuring for a Kaye Walker)
B	Floor to Elbow or Bent Arm
C	Inseam (Groin to Heel)
D	Floor to Armpit
E	Floor to Wrist (Arms relaxed at sides)
F	Standing Height (Laying measurement OK)
G	Chest Width
H	Hip Width (Measure in a straight line. If unsure, place a book touching each hip and measure distance between books)
I	Width at Knees (Observe position. Are knees wider than hips? Or windswept to one side or another? Record in notes below)
J	Knee to Heel (Consider measuring with shoes or any braces that are frequently worn)
K	Seat to Top of Head (Measure with support as if the assistive device was being used)
L	Seat Depth (Back of knee to the back of the Buttocks or surface of the back of the chair)
M	Seat to Shoulder (Measure with support as if the assistive device was being used)
